

Run Control Parameters: Server Selection

Run Control Server Selection

Contents

1. What is a run control? 1
2. What's changed regarding server selection?..... 1
3. Will I see a server name in the process monitor? 2

1. What is a run control?

Run controls set parameters for certain report types and for batch jobs. (Everything that runs in the process scheduler has a run control.) The screen below shows the page to find an existing run control and shows the tab if you need to create a new run control.

[Find an Existing Value](#) [Add a New Value](#)

Maximum number of rows to return (up to 300):

Search by: Run Control ID begins with

☐ Case Sensitive

[Search](#) [Advanced Search](#)

[Find an Existing Value](#) | [Add a New Value](#)

2. What's changed regarding server selection?

Starting with the VISION changes in May 2011, you will no longer need to select a server. In fact, there is no longer a drop down menu with a list of servers to select from. Below are screen shots of both the new 'server selection' screen and the old one.

New

Process Scheduler Request

User ID: TPESEK Run Control ID: TRIAL_TEST

Server Name:

Run Date: 04/08/2011

Main Content

Recurrence:

Run Time: 2:31:11PM

Reset to Current Date/Time

Select	Description	Process Name	Process Type	*Type	*Format	Distribution
<input checked="" type="checkbox"/>	VT Voucher Status Report	VTAP003	SQR Report	Web <input type="text"/>	PDF <input type="text"/>	Distribution

3. Will I see a server name in the process monitor?

For those of you who are familiar with the Process Details page, you will still see a server listed in the Run section. Please note that you may see new names.

Server names before the change	Servers after the May 2011 change
PSUNX	PSUNX
	PSUNX2
PSNTCR	PSNT
